

Scarce – poly

What do we have /  
20 OCT 2016

Hello everyone ! Today we have a new idea  
for you !!!

On thursday we realized we had different  
contents and they were all really interesting.

The question we had been asking ourselves  
is how to gather them together and make  
links between them ?

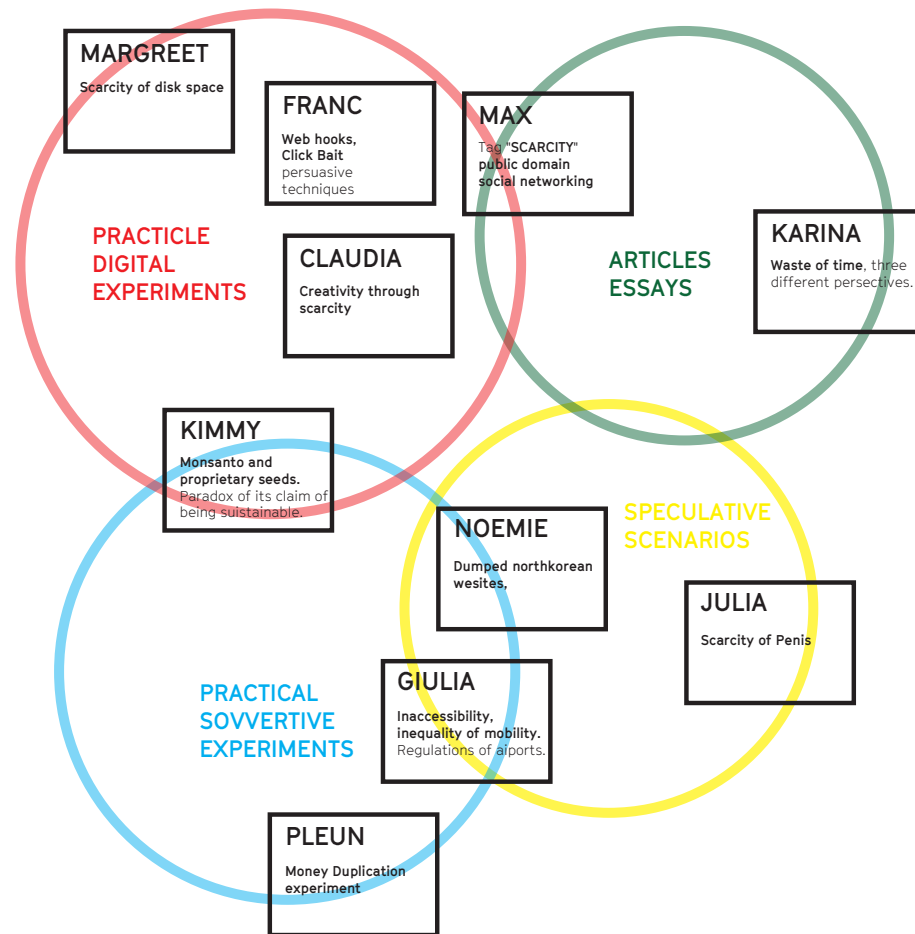

What we had of contents / ideas  
20 OCT 2016

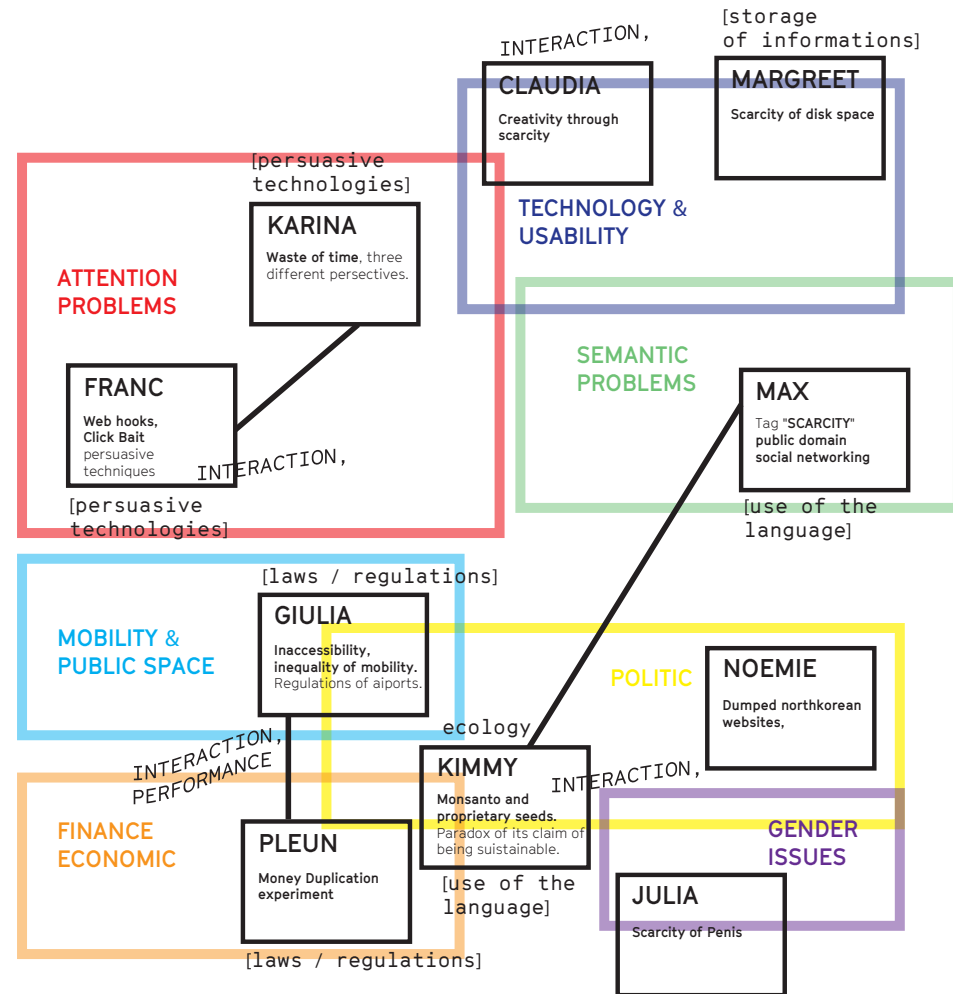

- misinforma<sup>o</sup>
  - Lies
  - Technologie is saving us
  - waste of attention
  - inequality
  - inaccessibility
  - memory lake of space.
  - clickability
- THEY ARE LYING TO YOU!

- 2 articles (Karna/Mah)
    - ↓ simple
    - ↓ gonna be TOOLS
  - 1 poster (Noemie)  
North Korean.
  - Interview (Claudia)
  - Analyse & interviews  
(Maya) the experts  
telling to tell what she  
wanted to explain (NOT about space)
  - Anima? (FRANC)
- #LIES  
#waste of time  
#front of society  
in so call domain  
#IT tools space

The mains ideas from the content.

- Misinformation
- Lies
- Technology is slaving us
- Waste of attention
- Inequality
- Inaccessibility
- Memory / Lack of space
- Clickability

# LIST OF CONTENTS SPECIAL ISSUE #SCARCITY

	TOPIC	DESCRIPTION PROJECT
MAX	Analysis of the use of the word "SCARCITY" in the public domain and social networking	Writing of a program, that's gonna write the article/essay itself.  Outputs: print article/ performance/ inter-active installation.
CLAUDIA	Creativity through scarcity + Benjamine Gaoulon interview.	Code based work. Randomly generated webpage, made glitching a predefined code, creating a new random layout everytime you refresh the page.
KARINA	Waste of time, three different perspectives.  Article / essay Opinion Piece	Article written in more perspectives. (maybe writing more versions of one article based on clickability. The "5 variations", from the less to the most clickable piece...) Topics: Attention, Interest, Search, Desire, Action, Like/dislike, Share, and Love/hate, clickbait, time management
FRANC	Web hooks, Click Bait as persuasive techniques	Interactive E-Book that explores and parody the techniques of "hooking attention". The article/essay/little book will record the attention span of the reader. Exploring attention defecits, and attention grabbing techniques.
GIULIA	Mobility, globality & being public. Inaccessibility, inequality of mobility. Experiment with the regulations of airports	Looking at who has "freedom" in regards to mobility. Airports are an isolated, easily accessible area and a crossover of many cultures, transports and movements. Form could take a performance, fake scientific diagrams, how to (get arrested) guides.
KIMMY	Monsanto and proprietary seeds. Paradox of its claim of being sustainable.	Both digital and analogue reflection. Digital: folder with a document inside that you can only open after 20 years. Infinite chain of folders with names snippets of the rethoric of Monsanto. Ongoing poem. Analogue: give away free street seeds.
MARGREET	Scarcity of disk space	Research around disk space, both offline and online. Inventory of disk space available offline and online. Document the ways services like Dropbox bargain extra space in exchange of promotion. Questionnaire going on.

What we had working on /  
29 OCT 2016

- 1 Starting point =  
few researches on the value of scarcity in the field  
we use to investigate/work on.
- 2 Solution =  
Using the structure of the game “monopoly”, we play  
the same rules of the famous game-parody of our  
economic system as a platform to show and discuss  
the intents of all the singular project.  
Every project becomes a field / city / district (as  
the districts of the game) on which every partici-  
pant can invest and build in order to make profit out  
of it.
- 3 Purpose =  
Analyze the “scarcity” of our society as an artifi-  
cial product of our capitalistic economic system that  
produce scarcity as a requirement for its functiona-  
lity. Question our desire of an infinite abundance and  
explain while gaming the un-sustainability and ab-  
surdity of this aspiration to a perpetual and planned  
growth.

So we played to manage to understand and  
replace the rules

“If there is universal abundance under capitalism, it needs to be privatized and locked away or capitalism will cease to function. If there is too much abundance even with privatization, to make capitalism work we need to have continual warfare, endless schooling, vast prisons, unlimited bureaucracy, and above all endless competition to burn up all that abundance which threatens an economic religion built around scarcity, even to the point where some people might rather blow up most of the planet to artificially create global physical scarcity and start the obsolete system all over.”

What are the instruction now /  
31 OCT 2016

1 / create a scenario / description / instruction behind the field

- What the player will do in your field ?
- How do want to treat your player on your field ?
- How the player should behave ?
- What your field is talking about ?
- What is its name ?
- What is the economical model ?

# What elements are in the Monopoly /

31 OCT 2016

board

Chance cartes

Destiny cards

dice

Players

fake money

Territory cards

How to transform those elements ?
